Policy Overview

Hospitals may receive reimbursement for visit codes (evaluation and management services) in addition to a laboratory test, but only when the hospital provides a room for an evaluation and management service by a professional. If a significant and separately identifiable evaluation and management service is provided to the patient in addition to the lab work, modifier -25 should be appended.

Application

This policy applies to outpatient hospital claims.

Reimbursement

Claims Reimbursement Edit

The Health Plan's code editing software will flag all hospital claims billed with modifier -25 for prepayment clinical validation. Clinical validation occurs *prior to claims payment*. Once a claim has been clinically validated, it is either released for payment or denied for incorrect use of the modifier.

Rationale for Edit

A hospital should not bill a visit code, for use of an exam room, for a registered outpatient if the patient was not seen by a provider. Billing a visit code in addition to the laboratory visit is inappropriate when the only other service performed was the collection of a specimen. Like all other procedures, room charges are included in the reimbursement for the procedure.

Modifier -25 should only be used to indicate that a "significant, separately identifiable evaluation and management service (was provided) by the same physician or Other Qualified Health Care Professional on the same day of the procedure or other service."

Pre-payment Clinical Claims review

A significant, separately identifiable E/M service is substantiated by documentation that satisfies the relevant criteria for the respective E/M service to be reported. If medical records do not indicate that significant, separately identifiable services were performed, the primary procedure or other service will be paid and the secondary E/M billed with Modifier -25 will be denied.

To avoid incorrect denials, providers should assign all applicable diagnosis codes that support the E/M services reported.

Documentation Requirements

Documentation from the physician or other qualified health care professional should indicate that an evaluation and management service was provided. The key components of an E/M service (history, examination and medical decision making) must be documented.
